Summer & Winter Inspections

The Local Maintaining Agency (LMA) is responsible for summer and winter inspections. The LMA is required to submit a report regarding summer and winter inspections to the California Department of Water Resources (DWR).

DWR must be informed on the:

- a) completion of the inspection
- b) any changes other than the results of normal maintenance
- c) corrections to deficiencies noted in this report

If additional items are noted, further documentation of those items must also be submitted.

The LMA should submit this information to DWR using the LMA web application tool available at:

http://cdec.water.ca.gov/lma.html

If the LMA is unable to submit information on this webpage, please contact DWR for assistance.

The LMA should submit the information and any associated documentation by September 30 for summer inspections and March 31 for winter inspections.

Repair Type: Non-Urgent Crossing Status: Found

UCIP Comments07/01/2019 Crossing has been modified from irrigation siphon to storm drainage prior to 2012. No permit has been found authorizing the modifications to this pipe. Pipe inlet on LS is buried in soil. Sinkhole approximately 2-foot in diameter and 2-foot deep located at LS toe along pipe alignment. This crossing was internally inspected as part of the DWR's Deferred Maintenance Project in 2017. Unable to determine what happened to the pipe section through the channel and opposite levee. Coordinating with LMA and Yolo County to determine owner of crossing. (O.Yakimov - DWR UCIP) 09/19/2012 Looks 24-inch HDPE pipe sleeved through 42-inch pipe. A 30-inch flap gate on WS looks recently replaced. (DWR UCIP - P. Amatya)

FIELD_STRUCT_DESC: 24-inch drainage pipe sleeved through an existing 42-inch siphon steel irrigation pipe through the levee, 13.5 feet below the crown. 42-inch pipe cut off and steel plate welded at WS toe, annular space seems to be filled with cement slurry. Pipe inlet enclosed into concrete casing on the landside (LS) end. (42-inch pipe authorized under Automatic Board Order (ABO) issued as Permit No. 10315, 1974 - Reclamation District No. 2035) [Additional Reference(s): DWR Levee Log, 1990. USACE Sacramento O&M Manual Unit 120, Willow Slough Channel Relocation and Levee Construction, February 1947, Drawing No. 50-4-2281 Sheet 2 (Station 193+70)]

Repair Type: Non-Urgent Crossing Status: Found

UCIP Comments97/01/2019 Crossing has been modified from irrigation siphon to storm drainage prior to 2012. No permit has been found authorizing the modifications to this pipe. Pipe inlet on LS is buried in soil. Sinkhole approximately 2-foot in diameter and 2-foot deep located at LS toe along pipe alignment. This crossing was internally inspected as part of the DWR's Deferred Maintenance Project in 2017. Unable to determine what happened to the pipe section through the channel and opposite levee. Coordinating with LMA and Yolo County to determine owner of crossing. (O.Yakimov - DWR UCIP) 09/19/2012 Looks 24-inch HDPE pipe sleeved through 42-inch pipe. A 30-inch flap gate on WS looks recently replaced. (DWR UCIP - P. Amatya)

FIELD_STRUCT_DESC: 24-inch drainage pipe sleeved through an existing 42-inch siphon steel irrigation pipe through the levee, 13.5 feet below the crown. 42-inch pipe cut off and steel plate welded at WS toe, annular space seems to be filled with cement slurry. Pipe inlet enclosed into concrete casing on the landside (LS) end. (42-inch pipe authorized under Automatic Board Order (ABO) issued as Permit No. 10315, 1974 - Reclamation District No. 2035) [Additional Reference(s): DWR Levee Log, 1990. USACE Sacramento O&M Manual Unit 120, Willow Slough Channel Relocation and Levee Construction, February 1947, Drawing No. 50-4-2281 Sheet 2 (Station 193+70)]

Inspector Comment

There appears to be runoff on the landside slope. It possibly could be from an abandoned pipeline that is caving in.

Summer & Winter Inspections

The Local Maintaining Agency (LMA) is responsible for summer and winter inspections. The LMA is required to submit a report regarding summer and winter inspections to the California Department of Water Resources (DWR).

DWR must be informed on the:

- a) completion of the inspection
- b) any changes other than the results of normal maintenance
- c) corrections to deficiencies noted in this report

If additional items are noted, further documentation of those items must also be submitted.

The LMA should submit this information to DWR using the LMA web application tool available at:

http://cdec.water.ca.gov/lma.html

If the LMA is unable to submit information on this webpage, please contact DWR for assistance.

The LMA should submit the information and any associated documentation by September 30 for summer inspections and March 31 for winter inspections.
